WHAT CYTOWAVE USERS ARE SAYING

“We use it on most of our top competition horses, 6 or 7 horses that regularly compete at the highest level of the sport, in between events, *we use it all the time.*”

McLain Ward, Two time Olympic Gold medal winner,
Pan American Gold Medal Winner, 2015

“We really found that we could use it not only to repair injuries and for *preventative care, but for maintenance of every horse.*”

Quentin Judge
Professional Rider, Double H Farm

“We’ve used it on other horses in the stable who had injuries and I’ve seen really good results with the CytoWave so now I use it on my top competition horses as *maintenance.*”

Mikala Gundersen
2015 Adequan Global Dressage Festival Top Prize
and Money Earning Winner

HOW CYTOWAVE WORKS

CYTOWAVE USES SUPERCONDUCTIVE QUANTUM INTERFERENCE DEVICE TECHNOLOGY TO MEASURE THE WAVEFORMS FOR HEALTHY AND UNHEALTHY TISSUES

A COMPLEX FORMULA IS USED TO BALANCE THE HEALTHY AND UNHEALTHY WAVEFORMS FOR SOFT, DENSE, HARD AND NERVE TISSUES.

- ▶ The balanced, healing signals for each tissue type are similar to the healing signal transmitted naturally by the body. They are stored in the Cytowave controller unit.
- ▶ Each treatment program starts with an initial signal to reduce inflammation, followed by the appropriate combination of signals to promote healing of the specific tissue type being treated.
- ▶ These signals are transmitted into the tissue with a mild electromagnetic energy (about 1/3 the strength of a refrigerator magnet).
- ▶ All treatment programs are 60 minutes. The “inflammation only” programs are 30 minutes. Treatments need to be applied every day to continue reducing inflammation and accelerate healing of the tissue.

WHAT CYTOWAVE USERS ARE SAYING

“We’ve used Cytowave most effectively for tendon injuries, some suspensory branch injuries. It’s been very helpful.”

Tim Ober, DVM
Head Veterinarian - US Olympic Equestrian Team
Over ten of Dr. Ober’s clients rent the Cytowave Therapy System

“It’s not a miracle...but it’s getting close.”

Barry Eisaman, DVM
Thoroughbred racehorse owner and trainer.
Owns an estimated 250 racehorses.

*“It most definitely takes the horse’s pain away faster than normal. When the swelling goes away, all the cardinal signs of inflammation - heat, swelling, loss of function and pain - **disappear at an accelerated rate.**”*

Jon Allen, DVM
